

ACTIVITY

Maps with Lego
Children develop their skills in recognising OS map symbols used in navigation and orientating a map using LEGO to build their own 3 models and maps.

Introduction
Children learn and practise the OS map reading and orienteering skills in this programme of team activities and games at Chellington.

Individual activities can be booked in any combination.

ACTIVITY

Swamp Escape!
Playing 'Swamp Escape' and 'Rescue Chelly the Owl' allow children to step into the map, ensuring they are all confident with the use of 4 figure grid references.

ACTIVITY

Orienteering
'On site Orienteering' gives children the opportunity to competitively practise map orientation and familiarises them with orienteering terminology and equipment.

A final 'Off site Orienteering' challenge combines OS map reading with the use of orienteering equipment, introducing children to compasses and challenging them to navigate around the countryside surrounding the centre.
